

Car Painter Job Description

- Using materials such as lacquer, resin, and so on to paint surfaces of vehicle units
- Getting rid of dirt or grease from vehicle surfaces and ensuring that the vehicle is well prepared and ready for painting
- Removing old paint with the use of liquid paint remover, scraper, or other effective techniques
- Carrying out a proper examination to see if certain parts of the vehicle need to be replaced, protected, or sanded to ensure that painting is properly done
- Ensuring that hand tools are properly maintained
- Properly maintaining paint booth by replacing filters and fan belts when necessary
- Administering the mix of colors and ensuring that they match with original color
- Applying primers and repainting surfaces with the use of spray guns
- Polishing the car by wet-sanding and buffing when the paint is dried
- Ensuring that certain portions of the vehicle are masked with tape and paper to ensure that each part of the car is painted correctly when using multiple colors.
