

Concrete Finisher Job Description

- Carrying out correct and accurate measurements to ensure that concrete meet blueprint specs
- Reading blueprints and examining drawings to ensure that they are correct and to also calculate the materials needed
- Creating patterns, forms, or foundations according to plans
- Ensuring that materials are broken or cut into the required size
- Carrying out the cleaning of excess mortar with the use of relevant tools such as trowels and other hand tools
- Executing the construction of corners with a corner pole, or by building a corner pyramid to ensure smoothness and efficiency
- Aligning structures vertically and horizontally
- Filling up expansion joints with the necessary and appropriate caulking materials
- Creating concrete forms and utilizing machinery to direct wet concrete into them
- Waterproofing, finishing and repairing concrete in new and existing structures.
