

Construction Assistant Job Description

- Keeping the machines serviced, and the job sites clean at all times
- Watching for hazards and reporting any concerns to the supervisor or safety personnel
- Cutting or shaping materials to specified measurements, using machines, hand tools, or power saw
- Assisting to install, connect, and test complete sanitary piping, and water systems
- Helping the builder in controlling and overseeing construction variances, preparing equipment and materials for returns, and securing them on site
- Supporting the builder in the final preparation of homes to be delivered to the customer care department and then finally to the homebuyer
- Assisting the construction manager in all aspects of the construction job from trench to move-in.
