

# Creative Graphic Designer Job Description

---

- Initializing a project by suggesting a general concept and presenting the idea with a rough layout, including sketches and digital illustrations.
- Liaising and working collaboratively with managers, engineers, artists, and other departments or as part of a creative team.
- Examining and evaluating the credibility of design and providing solutions or recommendations for possible issues that relate to the actual production of a particular design.
- Ensuring that a prototype is created within a particular project's specification and expectation.
- Overseeing and coordinating the services of external vendors.
- Utilizing the graphic design and any other relevant software.
