

Helper Electrician Job Description

- Providing assistance to senior electricians with basic electrical systems installation, repair, and maintenance
- Assisting with the execution of plans of electrical wiring for well-functioning lighting, intercom, and a variety of other electrical systems
- Preventing the breakdown of systems by routinely inspecting and replacing old wiring and insulated cables and cleaning circuits
- Helping with electrical installation, troubleshooting, and maintenance, and reading and interpreting technical drawings and specs, as well as the knowledge to carry out required hookups and connections
- Ensuring that all materials are on-site and available during the project and ensuring that electrical parts and materials are organized and transported to the supervising electrician as needed
- Handling the planning of layout and installation of wiring and fixtures under the supervision of the senior electrician
- Prepare and clean workspace for the senior electrician prior to the beginning of a project, and removing unused materials, dust, and dirt as required
- Logging activities and testing results.
