

Hospice Nurse Practitioner Job Description

Duties and Responsibilities:

- Manage patient's health in terms of pains, symptoms, and treatments
- Take care of the patient till he/she dies
- Provide patient's assessment to the main physicians
- Obtain the necessary equipment needed to take care of a patient at home
- Ensure the availability of medication to a patient
- Create a comprehensive care plan for other professional caregivers to follow
- Provide spiritual support for the patient or the family before and after the death of the patient
- Serve as the communication link between the patient, family, physicians and other caregivers
- Ensure emotional support to patients and their families
- Help to alleviate the suffering of patients who are going through pains, difficulty in breathing, perspiration, and other symptoms through the provision of medication
- Help to properly manage the patient's health condition instead of calling for an emergency or a transfer to a hospital.
