

Nurse Aide Job Description

- Keeps a clean facility
- Assists in caring for sick, disabled, and elderly patients
- Administers medication to patients who cannot do so themselves
- Transports and helps with bathing of patients
- Provides personal care needs, such as dressing, bathing or grooming needs, including makeup and brushing hair
- Ensures staff is well informed about the health conditions of the patient or client in their care
- Maintains proper temperatures of rooms, equipment, and supplies and operates water systems when appropriate
- Provides support in other areas of nursing care when requested by the nurse or physician, such as meal preparation
- Provides support when needed for other aides in order to ensure timely completion of tasks.
