

Quality Checker Job Description

- Records number and types of defect noticed or encountered while sampling some products
- Tests for durability of company's products
- Keeps in touch with the relevant regulatory authorities in a given geographical location
- Supervises the operation in the organization to ensure that all processes involved are competent to meet up with the desired output
- Advises the management on what to do to keep maintaining high standards of products
- Works in tandem with warehouse checkers or keepers to keep track of products acquired by the organization and their change in quality if there is any
- Performs regular quality check on the incoming goods to ensure they are what that is required
- Makes independent research about how best to ensure efficiency in quality of products from the company
- Makes market research to know what customers in the marketplace want in terms of quality at a given price
- Could serve as a coach to the production team on how to improve output
- Gives report to the relevant quality control bodies as a routine duty
- Could be needed in the decision making process of the organization
- Recommends outright rejection of goods or products that fall short of the standards of the organization or quality control regulatory body
- Keeps record of inspections for future reference
- Works with blueprints and plans to know how the needed quality could be accomplished.
