

Roofer Job Description

- Replacing or installing new roofing systems on buildings and customizing materials for individual roofs
- Ensuring that roofing materials are aligned with edges of roofs
- Cementing or nailing flashing-strips of metal or shingle over joints to ensure that they are watertight
- Critically inspecting a room to determine the best repair or replacement procedure for it
- Inspecting the work area to ensure that all required materials are present
- Ensuring that materials are properly trimmed to tightly fit along the edges of a roof and altering materials as needed
- Smoothing and leveling roof surfaces by smoothing out rough spots and preparing a surface for new shingles or waterproofing
- Ensuring that the job location is neat and safe by cleaning it up once the job is completed.
