

Site Laborer Job Description

- Carrying out tasks that involve physical labor at many different construction projects
- Executing work with the use of relevant hand and power tools of all types
- Loading and unloading equipment to and from vehicles and construction sites
- Ensuring that materials are transported to workers with specific skills
- Clearing work areas before and after the completion of a construction project
- Ensuring that construction sites are kept clean and free of unwanted materials
- Completing worksheets that contain the details of how many hours have been worked
- Arriving at the job site early to set it up and leaving the construction site last to ensure that the job site is clean and free of hazardous materials
- Taking measurements and carrying out calculations based on the measurement taken
- Assisting specialized tradesmen who are also working on the same construction project.
